Subject: [Non-DoD Source] Re: Attack Drone

See attached. The report on the EW testing we did in Kyiv.

We still have the request from the UKR LTG for 1000 units. If there is any way to get contacts for the EUCOM J5 and ODC in UKR that would be helpful. I have a team in Lviv now training some troops from their Alpha group and some other special units.

After this week, they will be well trained and be able to train others as well.

I look forward to hearing back. I am attaching, again, the cut sheet for the drone as there have been a few tweaks as requested by the British SAS, and the letter from LTG Shaptala.

Good morning,

The letter is finally coming. I have a part of the draft and expect to see it on UKR MOD letterhead today. As soon as I have the official version, I'll forward it to you.

During this testing, the Model-K8 showed stability and no performance degradation at a distance 5 km, 1 km and 500 meters from the control panel at a distance of 5 km from the Electronic Warfare complex with the Bukovel - AD UAV.

Anthony,

Thank you for reaching out. Should we require additional information we will let you know.

Certainly interested in seeing that report when it comes out if you are willing to share.

Thanks.

Subject: [Non-DoD Source] Attack Drone

Good morning from Brussels,

I thought I'd try you once more. We had more testing in UKR and we also evaded their EW attacks on our drone. They are generating a report we can share soon.

Let me know if we can discuss further
