RE: Request For Quote for the Cyberlux FlightEye Model-K8

The FlightEye Model-K8 System (P/N KGL031800 / ECCN 9A012.a.1.a) Munitions Delivery Aircraft System from Cyberlux Unmanned Aircraft Systems provides Special Operations Teams and Infantrymen with revolutionary advantages when confronting an entire range of battlefield threats including armored vehicles and helicopter gunships. Precision threat neutralization can be triggered at ranges of up to 5.5 km (3.4 miles) through either the pilot's radio FIRE command or impact detonation. Demolition charges consist of 1.13 kg (2.5 lbs.) of high explosive such as Semtex or US M112 (C-4). Field selectable payloads include the FlightEye™ HEDP (High Explosive Dual Purpose) munition and optional FlightEye™ AP (Armor Piercing) munition. Both munitions are operator field-loaded and provide wide area fragmentation patterns plus a shaped charge.

| FlightEye™ P/N KGL031800 MODEL-K8 SYSTEM COMPONENTS                         | P/N       | QUANTITY INCLUDED | MSRP | ORDER QUANTITY | TOTAL |
|-----------------------------------------------------------------------------|-----------|-------------------|------|----------------|-------|
| FlightEye™ MODEL-K8 EIGHT MOTOR X 9" DRONE                                  | KGL031815 | 1                 |      |                |       |
