Subject: Cyberlux Model-K8 program Request Letter and EUC fulfillment

Eric, as discussed, after our demonstration to both General Zaluzhnyi and General Shaptala at the Stare UKR base, we received a request letter from General Shaptala for the Model-K8 and UKR has issued a Non-Transfer and End User Certificate today to support the request letter. As stated by General Shaptala, "the Armed Forces of Ukraine urgently require the Model-K8 to accomplish combat tasks to confront the Russian aggressor successfully", and Cyberlux stands ready to fulfill the request once funded. I would appreciate getting this UKR package through the proper channels for execution. Please see attached.

Also, on September 9th, we attended a meeting with top officials from G2/G4/G6 and MOD at the 11 Mirrors Hotel concerning the Cyberlux Model-K8 product capability, operations and fielding, including the Company's heavy investment in customer service. I have attached that presentation for additional background.

As you know, the Model-K8 provides a unique capability which can be used in numerous use-cases and have an immediate impact in the current environment. Cyberlux Corporation is committed to deliver the FlightEye Model-K8 with its devastating impact in significant volume, up to thousands of systems per month as needed.

I'm standing by to help in any way.

Thank you - Mark
